Professional Higher Diploma in Software Engineering

Skills and Education Group Awards, a
distinguished UK awarding organisation, and UK
Awards

2022-2026

BSc(Hons) Software Engineering Top Up
Birmingham City University (Undergraduate)
(Birmingham City University UK)

PROJECTS

1. PlanMate – Task Management System

React | Java | Hibernate | MySQL | Tailwind

- A full-stack task manager with user authentication, notifications, and real-time task tracking.
- Implemented RESTful APIs using Java and Hibernate.
- Integrated React frontend with Java backend via Axios.
- Designed dynamic dashboards and progress charts.

2. JemPoint – E-commerce Platform

Java with Hibernate | MySQL | JavaScript | Tailwind | FetchAPI

- Developed a responsive online store with seller and admin dashboards, product management, and payment gateway integration.

3. ChateMate Chat App

React Native | WebSocket | Java Backend | Nativewind

- Built a real-time chat application supporting instant messaging, user authentication, and cloud database storage.

4. E-Trade – E-commerce Web Application

PHP | MySQL | JavaScript | Bootstrap

- Developed customer, seller, and admin dashboards for product management and analytics.
- Integrated secure checkout and payment functionality.
- Implemented responsive design for smooth user experience on all devices.

5. ERP Management System and POS System – Java Desktop Application

Java | JavaFX | MySQL | JasperReports | Hibernate

- An enterprise resource planning (ERP) desktop application designed to manage business operations including inventory, sales, and employee records.
- Developed modular JavaFX interfaces for different business departments.
- Integrated MySQL for centralized data storage and management.
- Implemented reporting using JasperReports for analytics and performance tracking.
- Built barcode-based product search and billing.
- Automated invoice generation and report printing with JasperReports.
- Implemented stock tracking and database synchronization.

5. BOOK MY SEAT – Movie Ticket Booking System

Android | Spring Boot | Firestore | PayHere | JasperReports

User App (Android)

- Firebase email/password and Google Sign-In authentication
- Movie listing with search and filter by genre/language
- 40-seat interactive grid layout with available/selected/booked status
- PayHere payment gateway integration for online payments
- QR code ticket generation using ZXing library
- Automatic email confirmation with QR code attachment
- Booking history to view past and upcoming reservations

Admin Panel (Web)

- Dashboard with revenue chart and booking statistics
- Add, edit, and delete movies with poster and details
- View and manage all user bookings with date filters
- Configure seat prices and block/unblock seats
- Generate daily, weekly, and monthly reports using JasperReports
- User management to view registered customers

Backend (Spring Boot)

- REST APIs for user app and admin panel
- Firebase Firestore for real-time database
- Email service using Gmail SMTP
- QR code generation and attachment service

WORK EXPERIENCE

1. IT Supervisor

Expolanka (EFL) Logistic Company Srilanka (2025 – 2026)

- Managed data entry operations and maintained system accuracy.
- Coordinated IT-related tasks and supported operational workflows.
- Worked with internal systems and databases to ensure data consistency.

2. Software IT Coordinator (POS / ERP System)

Chiox Software Solutions Pvt Ltd Srilanka (2024–2025)

- Supported ERP and POS software system operations.
- Assisted with software troubleshooting and customer support.
- Worked with databases and system configurations.
- Collaborated with teams to improve software performance and usability.
